

Beautiful cladding. Built to generate.

Electricity from the facade you already need.

Custom colours and imagery. Long-term confidence.

Cladding is essential. Electricity is the extra.

BIPV brings solar generation into architectural glass cladding.
The same surface finishes your building and produces electricity.

Titaan, The Hague. Patterned solar panels integrated into the upper facade.

A slight extra investment.

Your project already includes cladding.
Compare the upgrade with the value
of electricity generated over time.

480-600

Wh per m² per day*

Indicative daily energy.
Varies with chosen colour.

*Calivon estimate. Actual yield depends on colour, sunlight and project conditions.
The additional investment is assessed against your specified cladding.

The finish is yours

Custom colour. Printed patterns. Your own artwork.

1,000+

standard colours

Custom matching for your chosen palette.

BRICK

GRAPHIC

IMAGE

Solar glass can carry the visual identity of your project.

Representative samples. Final colour and image reproduction agreed through samples.

Your design. With electricity built in.

Photographs, artwork and patterns can become solar cladding.

Soltech, Genk. A photographic image printed across a solar facade.

Harmony House, Dubai. Prototype facade.

Already approved?

We work from your chosen design, matching its colours and character in solar glass. Sizes and finishes are tailored to the project.

Samples and project detailing confirm the final appearance and fit.

Made for the years ahead

Lasting colour. Long-term generation. Straightforward care.

50

YEARS

COLOUR STABILITY¹

Ceramic colour fired into glass.
Resists UV and weathering.

UP TO

30

YEAR

POWER WARRANTY²

For the electrical output of
eligible modules.

Titaan facade detail. ColorBlast Design. Photo: Kameleon Solar / Bjørn Vijlbrief.

Built for sun and harsh weather

Durable glass and ceramic colour
for sun and harsh weather.

Care that fits your building

Routine glass cleaning and scheduled
electrical checks within your care plan.

¹ ColorBlast colour fastness. ² Eligible Kameleon modules. Manufacturer terms apply.

Solar Pavilion, Eindhoven. A spectrum of ColorBlast solar panels.

Your facade could be doing more

Bring us your approved drawings or a design idea.
We will help you see it as electricity-generating cladding.

YOUR FINISH

See colours and
physical samples.

YOUR INVESTMENT

Compare the upgrade
with planned cladding.

YOUR ELECTRICITY

Review the potential
for your building.

Arrange a facade concept consultation with Calivon.
